

# DIGITALISATION AND INDUSTRY 4.0 DRIVER LICENSE®

## Are you on target for industry 4.0?

### “Four point what?”

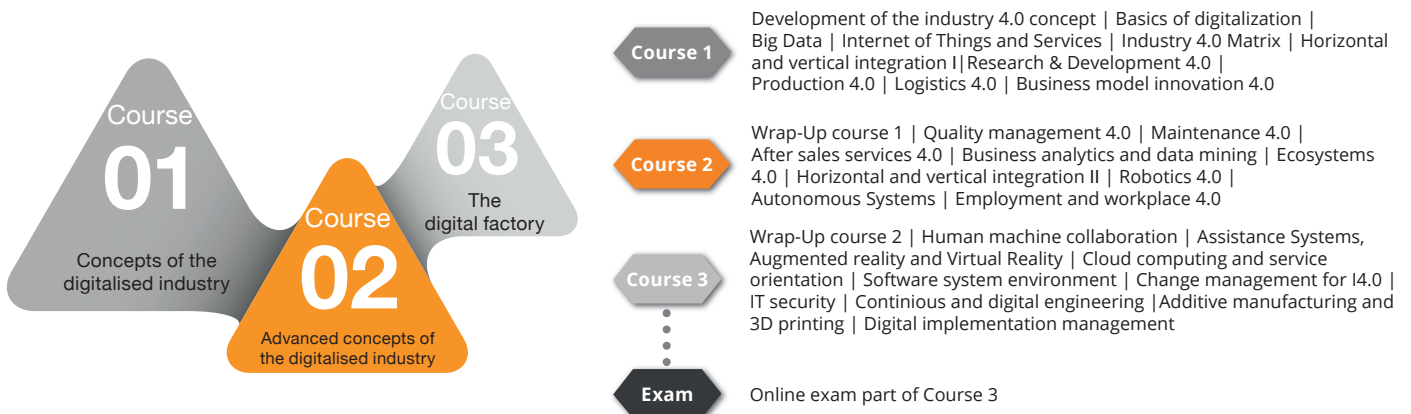

Industry 4.0 stands for the digitalisation of the whole industry. The term describes the comprehensive transformation to flexible and adaptable production networks on the basis of networked and data driven infrastructure. The target of industry 4.0 is therefore the intelligent company, that is characterized by transformation ability, efficiency of resources, collaboration of humans and machines and a continuous integration of adding value partners.

Thereby the digitalisation is going to change our whole working environment and therewith the function of the people. New potentials for efficiency and cost reduction as well as new products and services based on innovative business models are created.

“In the industry, the challenge of the digitalisation is often discussed, without approaching it concrete and systematically.”

### The first systematic and practice oriented industry 4.0 training course

## KEY QUESTIONS IN COURSE 2

- Why is it important to integrate all departments in the digital transformation?
- How does i40 change maintenance and QM?
- How do digital ecosystems change the economic landscape?
- Why are autonomous systems already reality?
- How is industry 4.0 changing the role and the meaning of employees and work?

## YOUR PROFIT

- systematic comprehension for the digitalisation
- concrete approaches for your company
- insights into already implemented industry 4.0 projects
- intensive interchange with other course participants and the trainer
- character of a interactive workshop

## WHAT ELSE YOU SHOULD KNOW

- venue: worldwide (2 days)
- course materials and catering will be provided
- in-house training course on request

“Industry 4.0 requires a whole new mindset, that a lot of companies haven’t realised yet.”
